

# SENKO

For perfectly  
warm home!

## PRODUCT CATALOG

cookers • stoves • fireplaces • electric boiler

2024

*Senko d.o.o. is a family business, founded in 1978, which has been working on the development, production and improvement of stoves, ovens and fireplaces on wood biomass for over thirty-five years. Years of continuous growth, constant investment in new technologies and complete commitment to the development of our own innovative products have resulted in the fact that today we are a modernly equipped factory that, on 4000 m<sup>2</sup> of production space, with professional and experienced employees, develops new models of stoves in accordance with EN standards.*

*We can guarantee our customers top product quality because within SENKO production we have a complete process: from our own product development department, preparation of parts by laser cutting and punching, CNC robotic welding of boilers and line assembly to a modernly equipped laboratory for quality control and product testing.*

*All SENKO products are manufactured in accordance with EN standards and bear the CE mark and Declaration of Properties. With our name, we guarantee the quality of our stoves, ovens, fireplaces, and in recent years also electric boilers!*

*Biomass heating systems (wood and pellets) are a proven and most efficient way for heating your home. It is environmentally friendly and no threat for your health. Firing with wood will give the perfect warmth, comfort and positive atmosphere to your whole environment and to your home.*

## WHY HEATING WITH WOOD BIOMASS?

- ENVIRONMENTALLY FRIENDLY ▪ 100 % REUSABLE ▪
- SAFE AND SIMPLE USAGE ▪ EASY INSTALLATION ▪
- SIMPLE STORAGE; HARMLESS FOR HOUSEHOLD AND ENVIRONMENT ▪

*A well-planned restoration of forest areas is a sustainable source of thermal energy which, when burned, does not increase CO<sub>2</sub> emissions in the atmosphere, given that the same amount of CO<sub>2</sub> is needed for the regrowth of an equal amount of wood biomass.*

## ADVANTAGES OF SENKO COOKERS

An external combustion air supply is mounted at the rear side of the cooker.

All models are equipped with glass firedoor to enable control of fuel combustion.

SENKO cookers are coated with firebrick, which has a positive affect on the combustion quality.

Chimney / Flue connection is height adjustable to facilitate easier installation.

Intake of secondary air into the firebox provide an additional fuel efficiency and combustion of harmful gases - SENKO GREEN LABEL.

Cooking plates are 8 mm thick and ensure long operational life of the cooker.

To change the grate's summer - winter position during firing, models for central heating offer thread driven firebox grate.

POSSIBILITY!  
Glass-ceramic cooking plate (CERAN).

# PELLET STOVES

## SENKO PELLET STOVES

- • • • *SENKO pellet stoves are used for heating residential spaces and/or as central heating and at the same time they can be a decorative element in every ambience.*
- • • • *Fan blows warm air from the stove to the room through special grids on the front side of the stove. The second fan is leading the primary air to the firebox and at the same time flue gases are lead from the firebox to the chimney. SENKO pellet stoves are distinguished by their high efficiency (91-96%) as well as a very low environmental pollution level. They are designed and produced down to the last detail in order to satisfy, in the best way possible, all consumers' needs regarding functionality and safety.*

SENKO PELLET STOVES FOR CENTRAL HEATING HAVE MOST EQUIPMENT ON THE MARKET:

- » high-efficiency circulation pump
- » closed expansion vessel
- » safety valve 2.5 bar
- » valve for filling-emptying the bolier
- » automatic air vent

## ADVANTAGES

### SENKO PELLET STOVES

- ◆ Dosing of pellets to the firebox is automated and programmed with an electronic switch by means of a screw feeder.
- ◆ Control panel secures a simple handling and adjusting of all required parameters - menu on 14 languages (HR-SI-RS-RO-IT-EN-FR-ES-DE-PT-NL-GR-TR-HU).
- ◆ Regulation by remote control - switching on / switching off, adjusting the fan speed, heating power.
- ◆ Possibility to programme daily / weekly work schedule of the stove (6 available programs).
- ◆ Possibility to regulate space heating temperature by means of a room thermostat.
- ◆ Possibility of connecting outside air required for combustion (avoiding oxygen consumption in the room for dwelling).
- ◆ Safety devices which are automatically stopping the dosing of pellets to the firebox and reporting the alarm signal on the control panel.
- ◆ Possibility of monitoring the pellets consumption in kg/h.
- ◆ Possibility of regulation by smartphone - wifi module (OPTION).
- ◆ Touch screen display – ONLY at P 8 AIR SLIM and P 10 WATER+AIR SLIM stoves.

## Specification of SENel electric boiler for central heating with or without hot water preparation

- ◆ Small device size of all models from 6 to 30 kW.
  - ◆ Modern design in two colors (white and anthracite + GLASS DESIGN by orders).
  - ◆ Quality and reliable components of the well known European brands.
  - ◆ Simple power reduction.
  - ◆ Easy and fast installation.
  - ◆ Selective and modulation ignition relay / heater.
  - ◆ Fully automatic power control.
  - ◆ Water overheating protection, too high and too low pressure.
  - ◆ Complete hydro equipment WILO electronic pump, safety valve, breather valve, pressure thermometer, expansion vessel.
  - ◆ Available models 6, 9, 12, 15, 18, 22.5, 24 and 30 kW - SENel for central heating and SENel COMBI for central heating and hot water preparation 15, 18, 22.5, 24 and 30 kW.
- ◆ ANTIFROST function
    - frost protection system
    - switching on the device at temp. water below 5°C.
  - ◆ ANTIBLOCKING function
    - pump blockage protection
    - pump activation 1 min every 23 h.
  - ◆ TIMER function
    - simple and automatic adjustment at a given time.
  - ◆ Room control function thermostat.
  - ◆ Based management function temperature in the water tank.
  - ◆ WIFI management
    - application with possible settings of temperature and timer.
  - ◆ MODE SUMMER - WINTER
    - energy saving.
